TRIAL OF LONG-TERM TREATMENT OF MULTIPLE SCLEROSIS WITH TOLBUTAMIDE. 15 Jan 63, 3p.
Order from SLA $1.10 63-10905

63-10905

L. Vogt U.

Trans. of Medizinische Klinik (West Germany) 1962, v. 57, p. 1016-1017.

DESCRIPTORS: Therapy, *Multiple sclerosis, *Orinase; Hypoglycemia, Drugs.

Nineteen patients with multiple sclerosis were treated up to 10 months with tolbutamide, first as bed patients and then ambulatory. During this long-term treatment relapses were observed in four patients, after an initial improvement in neurological symptomatology. In none of the other cases could a change in the course of the disease be demonstrated. A relationship between a disturbance in carbohydrate metabolism, the course of the disease, and the use of tolbutamide was not observed.

(Biological Sciences - Pharmacology, TT, v. 10, no. 6)

Voigtlaender-Tetzner, G.
ON THE THEORY OF THE X-RAY DISTRIBUTION CURVES FOR LIQUIDS AND AMORPHOUS SUBSTANCES. [1960] [29]p. 35 refs.
Order from SLA mi$2.70, ph$4.80 61-10655

Trans. of Zeitschrift für Physik (West Germany) 1958, v. 150, p. 215-230.

The statistical frequency distribution for liquids and amorphous substances is obtained experimentally, by a Fourier transformation of X-ray scattering intensities. It is impossible to avoid a cut-off effect, which distorts the "radiographic distribution curve" so obtained in a characteristic manner. The degree of distortion depends on the magnitude of the statistical deviations of the atom sites in the irradiated volume and on the limit of measurement of the scattering intensity. In order to examine these influences, the equation for scattering intensity in liquids and amorphous substances is derived. The Fourier transform

Voigtlander, G.
TENDERING OF CELLULOSE FIBERS BY HYPOCHLORITE, IN DEPENDENCE OF REDOX POTENTIAL, rH AND pH VALUE. [1961] 7p. 5 refs.
Available on loan from SLA 61-14504

Trans. of D[eutsch]e Textiltech[nik] (East Germany) 1961, v. [illegible], no. 10, p. 573-574.

The bleaching and tendering action of hypochlorite liquors is a function of the rH value and of the HOCl concentration. The magnitude of both factors is determined by the pH value, so that the practical man has only to adjust the latter and maintain it constant, and can omit the measurement and calculation of redox potentials and rH values.
